Hi Steve,

I believe (b) (6) home is not on the original refinery proper, from the map she sent and the map in the site file it appears that her residence is across the street from the old refinery. I am including Amy Brittain with ODEQ on this email. I will follow up with Chris next week and we will call if we have any questions. Hope your move was as smooth as those things go and look forward to talking next week.

Hi Brenda I received your email concerning this project. Since this site was formerly utilized as a refinery, the OERB will not be able to perform restoration activities (the OERB doesn't restore refineries). Would recommend that this matter be referred to the OKLA DEQ as they would have jurisdiction. As always please feel free to call with any additional questions that you or Chris Ruhl may have in this regard. We are moving offices today and tomorrow but should hopefully be in operation by Monday. Our toll free # is 8006641301 ext. 234. Thanks

Hi Sarah,

Thank you for your help today. Here is the email that Chris Ruhl of EPA received from (b) (6) regarding her property near the old Ohio Oil Company near Bristow, Oklahoma. EPA did an investigation of Ohio in late 1998 and determined that the site did not qualify for remedial action under Superfund. I have attached the record of our decision. I will be following up with (b) (6) to let her know that EPA has no plans to perform remedial activities at the former Ohio Oil Company site, and to let her know that someone from OERB will be contacting her. I will include your agency on that correspondence. Once again thank you for your assistance in this matter.

Thanks for sending me your photos. I believe that EPA is in discussions with the Oklahoma Department of Environmental

Quality (ODEQ) about the former Wilcox Refinery site. I don't have any information but Brenda Cook is our lead for these discussions and I have cc her on this message. She can be reached at (214) 665-7436.
